Serving Big Cabin, Welch and Blue Jacket

Announcing a new FCC.gov. Tell us what you think

and help shape the future

Network Management Policy

At Atlas Telephone we provide all customers secure access to a point-to-point protected internet connection. It is essential, as your internet provider, that we reasonably manage our network to promote the use and enjoyment of the internet to all users. By engaging in reasonable and responsible network management, Atlas prevents its users from being subjected to the negative effects of spam, viruses, security attacks, network congestion, and other risks that threaten to degrade service. In the interest of providing the best online experience possible for all of our users, Atlas utilizes these network management practices, that are tailored to achieve safe usage for all customers. The network management practices employed by Atlas are consistent with industry standards.
